

How to use the Document Camera with Zoom

Step One

Click **Share Screen** on the menu at the bottom of the computer screen

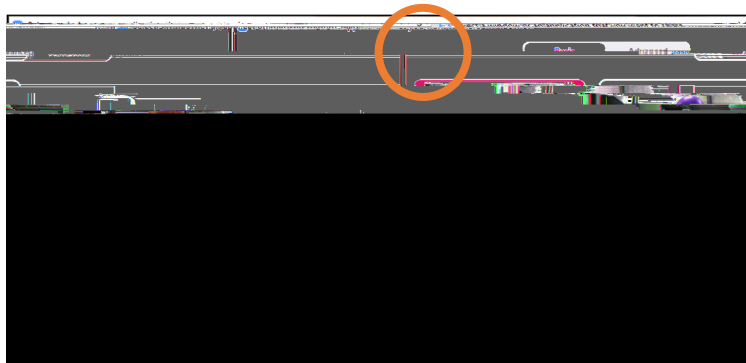

If you are already sharing, you will need to Click **New Share** on the menu at the top of the screen

Step Two

Click **Advanced** at the top of the Pop up Page

Step Three

Click **Content from 2nd Camera**

Then click **Share**

Note:

While showing the Document camera the  button will appear in the upper left corner. This button will allow you to toggle between the Document Camera and Main Camera. This is a great feature for faculty that traditionally teach at the Blackboard. While lecturing, toggle to the **Main Camera** and while writing toggle to the **Document Camera**.

If you want to return to other content (ie. PowerPoint or video), simply click **Share Screen** or **New Share** and then switch from **Advanced** back to **Basic**.
